

WHAT IS APRAXIA?

Childhood Apraxia of Speech is a neurological speech disorder that makes it difficult for children to accurately plan the fast and ordered movements of structures such as the lips, tongue, and jaw that are needed to produce clear speech.

WHAT HELPS?

Speech therapy—Early, frequent and intensive; must be appropriate for the underlying problem of speech motor planning & programming.

Communication—Alternative methods to aid in expression of thoughts, needs, ideas, etc.

Love & Support—from family, relatives, and community members
