COURSE ABSTRACT

The Kaufman Speech to Language Protocol evaluation and treatment approach will be demonstrated during this workshop. Elements of shaping word approximations and the use of phonological processes in therapy as well as cueing systems will be highlighted via video. This effective method for children with apraxia of speech will be shared in a functional manner, with many tips and suggestions clinicians and parents can use immediately!

LEARNING OBJECTIVES

At the end of this course participants will be able to:

- Describe a hierarchy of simple to complex motor speech skills.
- Utilize this hierarchy to evaluate children who have severe speech disorders.
- Implement a specific treatment approach following motor learning theory, ABA teaching principles, and phonological simplification for CAS.
- Understand the rationale of shaping successive word approximations.
- Be able to analyze video to establish goals per this approach.
- Understand and analyze a norm-referenced, standardized test which relates directly to this approach in order to identify this unique population of children.

COURSE LEVEL

Intermediate/Professional Area. Participants are expected to have some prior academic and/or clinical experience with children with severe speech disorders. Families are most welcome at the workshop with the understanding that the level of presentation will be at the intermediate professional level.
