

# YOU ARE INVITED TO PARTICIPATE...

Children with childhood apraxia of speech are invited to participate in a study exploring the relationship between their talking and writing. The children will be evaluated on their verbal skills, their pre-literacy skills, their spelling skills, and their vocabulary skills. A free written summary of the test results will be provided upon completion of the study. Parents of children with childhood apraxia of speech will also be asked to complete a brief survey. Children with a primary diagnosis of childhood apraxia of speech and between the ages of 5 and 7 years and their parent are eligible to participate in this study.

The entire evaluation will take approximately 40-60 minutes to complete and will be completed in the convenience of your home.
