## What is childhood apraxia of speech?

Childhood apraxia of speech (CAS) is a motor speech disorder. It makes it difficult for me to plan the movements required for speech! It takes many years of therapy to learn how to say phrases like 'Trick or Treat' or 'Happy Halloween'!

I'm in speech therapy now and working on speaking! Thank you for giving me a treat!

**Learn more at [www.apraxia-kids.org](http://www.apraxia-kids.org)!**
