

# Speech & Language/ OT Apps

A resource to encourage home practice

2<sup>nd</sup> Edition

Behavior and Developmental Pediatrics  
Penn State Hershey Medical Center

**PennState Health**  
Children's Hospital

# Introduction

Our directory is a compilation of applications for parents, children, and therapists to use as a resource to encourage home practice.

Please note:

- we are not endorsing any specific apps; this directory is meant to be a guide/resource where parents, children, and therapists can find app suggestions in one place that they can then further explore
- the descriptions of the apps are adapted or taken directly from the app store or the app developer's website
- the applications are organized based on the main skills that they target, but some apps can fit into multiple categories
- parents should consult with their child's speech or occupational therapist to determine which apps are most appropriate for them

The speech and language apps are divided into four main categories: 1) alternative and augmentative communication (AAC), 2) speech, 3) language and language learning, and 4) behavior and social skills, as well as some subcategories. Occupational therapy supplement apps are divided into three main categories: 1) fine motor, 2) handwriting, and 3) vision, as well as some subcategories.

# Augmentative and Alternative Communication (AAC)

<b>Talk Board</b>	\$16.99, free version available	TalkBoard turns your iPad, iPhone, and iPod Touch into a communication aid and visual prompt board. You can easily add <b>your own pictures</b> and symbols to personalize the app for your children.
<b>AACorn AAC</b>	\$69.99, plus available in-app purchases	AACorn's innovative design goes beyond speaking words and emphasizes language learning. The unique visual <b>"Word Tree"</b> shows the connections and relationships between words, which is critical to helping to understand meaning and develop language understanding. AACorn learns to predict what a child wants to say.
<b>Abilipad</b>	\$19.99	Abilipad is a <b>customizable</b> keyboard and adaptive notepad, with word prediction and text-to-speech.
<b>CoughDrop</b>	2 month free trial period then \$6/month subscription	CoughDrop is flexible and configurable enough to work with the access and comprehension needs of many communicators. CoughDrop runs on <b>multiple devices</b> , so you can log in on your tablet, phone and computer and have access to the same communication tools and interface.
<b>Grace</b>	\$29.99	Grace App is an evidence-based <b>picture exchange</b> app designed to encourage and reward independent communication through the use of images.
<b>iCommunicate</b>	\$49.99	iCommunicate lets you <b>design</b> visual schedules, storyboards, communication boards, routines, flash cards, choice boards, speech cards, and more. It is customizable to your child's needs.

<p><b>LAMP Words for Life</b></p>	<p>\$299.99, plus available in-app purchases</p>	<p>LAMP Words For Life™ is a full vocabulary augmentative and alternative communication (AAC) language app that combines the PRC Unity® language system with Language Acquisition through Motor Planning (LAMP™) principles and strategies. The app is symbol based for those who are not yet literate; however, those symbols are paired with text to <b>support literacy development.</b></p>
<p><b>My First AAC</b></p>	<p>\$24.99</p>	<p>My First AAC is an affordable augmentative and alternative communication application for the iPad that is specifically designed for <b>toddlers and preschoolers</b> with delayed speech or severe speech disorders.</p>
<p><b>My Smart Hands</b></p>	<p>\$0.99</p>	<p>My Smart Hands Baby Sign Language Dictionary teaches you and your little one the <b>300 ASL signs</b> you need to know for clear communication. iPhone only.</p>
<p><b>Point to Pictures</b></p>	<p>\$1.99</p>	<p>Point to Pictures is an augmentative communication <b>training</b> app designed for those persons <b>learning</b> to point to/select a picture on an iPad in order to get that item in real life.</p>
<p><b>Proloquo2Go</b></p>	<p>\$249.99, plus available in-app purchases</p>	<p>Proloquo2Go is one of the few AAC apps designed to support all users, from <b>beginners to advanced.</b> This lets someone develop from single words to full grammatically correct sentences in the same app.</p>
<p><b>Scene &amp; Heard</b></p>	<p>\$84.99</p>	<p>Use visual scenes for context based communication or create new learning aids with <b>interactive features.</b> Whether you are a parent, therapist, or caregiver, the easy-to-use interface will help you import photos and allocate actions to any scene.</p>
<p><b>So Much 2 Say</b></p>	<p>\$18.99</p>	<p>A picture communication AAC app that is designed specifically for individuals with cognitive and language impairment. <b>Flexible layout options,</b> ranging from a single card per page to multiple pages of categories, make it easy to use.</p>

**Predictable** \$159.99

Use the latest word prediction technology to make **speaking out** a text-based message easy. Predictable features a world-class software which learns from your patterns of use and predicts what you will type next in your message easily and accurately.

**Go Visual Scene Maker** \$49.99

Just-in-time programming makes it easy to draw a hotspot, add text-to-speech, or record a voice for playback. Enriches language development while providing powerful communication. Key features are Video Scene Displays, a great way to **model job tasks** and help young adults communicate in the work place, and Transition to Literacy, in which a word dynamically pops up over the scene for several seconds to increase literacy comprehension.

**Pictello** \$19.99

Pictello helps develop literacy skills by supporting reading with word-by-word text highlighting, assists in writing and spelling with built-in word prediction and Speak as You Type, and allows you to create stories to teach **academic and social skills**. Each page in a Pictello story consists of a photo or video and some text, which can be read aloud by a Text to Speech voice or your own recorded audio, both of which are very customizable.

**Go Talk NOW** \$79.99, lite version available

Three styles of communication pages (Standard, Express, and Scenes) allow you to create as many **communication books** as you need with unique settings and unlimited pages. Go Talk NOW has adjustable page layouts, customizable navigation, recorded and text-to-speech capabilities, and an included symbol set to assist in communication.

**Tobii Dynavox Compass** \$179.99

Provides a research-based communication solution for individuals of all ages and abilities who cannot use their natural voice to **participate in their everyday lives**. Includes pre-stored messages, keyboards, core word strategies, whiteboards, and pain scales. In addition to the exciting and dynamic communication options available at your fingertips, the Compass app uses the cloud technology to manage and update your communication pages anytime and anywhere.

**Sono Flex**

\$99.99, lite version available

An easy to use AAC vocabulary app that **turns symbols into clear speech**. It offers language to nonverbal users who are not yet in full control of literacy.

**Snap + Core First**

\$49.99, plus available in-app purchases

The success of the Snap + Core First platform stems from the cohesive use of the **Core Word framework**, topics, quick phrases, behavior supports, word lists, and keyboards that let a user naturally engage with others.

**Snap Scene**

\$49.99

Snap Scene provides **instant scene-based** communication and language learning for you child. Take a photo and tag it with recordings to let your child communicate on the fly.

**Sounding Board**

Free, plus available in-app purchases

Create **custom** boards using AbleNet symbols or your own words.

**Speak for Yourself**

\$299.99, plus available in-app purchases

Speak for Yourself uses a word-based vocabulary of the most frequently used words in communication, and contains features important in developing automaticity and language. Allows the user the potential to **access almost 14,000 words**, with no more than two touches to say a word.

**MyVoice - Tap or Type to Talk**

\$9.99

Type anything you like and have MyVoice speak it for you. Has many different categories of images that the user can navigate through and then have them spoken aloud by simply tapping the simplistic images. **Mirror talk feature** can be used to exercise facial muscles.

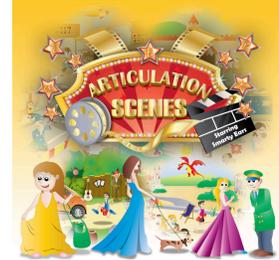

**TouchChat**

\$299.99, plus available in-app purchases

Words, **phrases and messages are spoken** with a built-in voice synthesizer or by playing recorded message. Text generated with TouchChat can be shared on Facebook, Twitter, Google+, or via iMessage and email. Text from other applications can be copied to TouchChat so that it can be spoken out loud. Available in English and Spanish.

# Speech

## ORAL AWARENESS

**Speech Tutor** \$19.99

The animations inside Speech Tutor take the areas of the face that impede the view of tongue placement and positioning and make them transparent. Offers a **“side view” and “front view” of each sound production.** Users can choose to record themselves as they practice their target sounds and then choose to play it before and after a correctly modeled production.

**Speech Blubs: Language Therapy** 7 day free trial, then \$9.99/month subscription

Speech Blubs is a voice controlled speech therapy app designed to help your child learn new sounds and practice speaking in a stimulating, educational environment. **Uses video modeling.**

**Smart Oral Motor** \$5.99

This app includes a total of 15 oral motor exercises, auditory information and fun animations via Clever the Duck, who provides auditory and visual cues for practicing several oral motor exercises.

## PERCEPTUAL LOUDNESS

**Voice Meter Pro** \$3.99

Simple, but effective app that helps those with autism, hearing, voice disorders, or any other individual monitor the volume of their own voice in a **fun and engaging** way.

**Kids Noise Meter & Voice Control** Free, plus available in-app purchases

Easy to use tool that helps an individual or group regulate their voice levels. The interface is appealing to kids and helps them monitor and adjust their volume.

## ARTICULATION

**Articulation Scenes** \$34.99

Developed and designed by a certified speech language pathologist, this app allows children to practice their sounds with a variety of engaging and fun activities centered around the **cinema theme**. Based on scenes, it provides numerous opportunities for children to pronounce their sounds more clearly.

**Articulate it! Pro** \$46.99

A unique multi-player app created specifically to help children improve their speech sound production. Designed by a certified speech-language pathologist, it contains over 2000 images selected for working on English **consonant sounds** at the word, phrase, sentence, and story level.

**ArtikPix**

Free download with available in-app purchases, or full version for \$29.99

Articulation app with **flashcard and matching activities** for children with speech sound delays.

**Articulation Station**

Free download with available in-app purchases, or full version for \$59.99

Created by an SLP, this articulation application helps children as well as adults learn to speak and **pronounce their sounds more clearly**. Activities at the word, phrase, sentence, and story levels.

**Charades Articulation**

\$4.99

Elaborates on the classic party game of charades by including a comprehensive collection of **over 1,000 sound-specific articulation words**. These words are designed for SLPs to use with individuals who exhibit difficulty producing certain speech sounds.

**Dance Party Articulation**

\$4.99

Dance Party Articulation is a unique musical speech therapy app that can instantly turn any therapy session into a full-fledged **dance party**.

**Game Show Articulation**

\$4.99

Game Show Articulation is a unique speech therapy game that turns students into game show contestants and challenges them to answer **super fun trivia** questions for a chance to win cool prizes.

**I Dare You Articulation**

\$4.99

An app that features a collection of **600 child-friendly dares** designed for SLPs to use with individuals who exhibit difficulty producing certain speech sounds.

**Listen Close Articulation**

\$4.99

A unique speech therapy game that challenges players to **memorize and repeat** an ever-increasing string of articulation word sequences.

**Multiple Choice Articulation**

\$4.99

An interactive app that features a collection of **over 500 multiple choice questions** designed for SLPs to use with individuals who exhibit difficulty producing certain sounds.

**Missing Letter Articulation**

\$4.99

An interactive app that features over 1,000 sound-specific articulation **word puzzles** (words that are missing one letter). Your goal is to figure out which letter is missing before the timer runs out.

**Open-Ended Articulation**

\$4.99

An interactive app that features a collection of over **500 open-ended questions** designed for SLPs to use with individuals who exhibit difficulty producing certain speech sounds.

**Silly Sentence Articulation**

\$4.99

An interactive app that features a collection of over 500 **silly sentence questions** designed for SLPs to use with individuals who exhibit difficulty producing certain speech sounds.

**Wacky Selfie Articulation**

\$4.99

A comprehensive collection of over 450 hilarious sound-specific **stickers** that can be placed on top of a selfie photo to turn a regular selfie into a wacky one.

<b>SpeechBox</b>	Free, plus available in-app purchases	Practice speaking simple words with hundreds of engaging colorful pictures in over thirty categories. You can <b>add your own pictures</b> or download additional boxes to customize your speech practice.
<b>Speech Cards Pro</b>	\$9.99	Each card shows customizable text and pictures. Tap on the text or picture to hear an audio recording. Use the microphone to practice speaking and then listen to get <b>immediate feedback</b> .
<b>Speech FlipBook</b>	\$9.99	You can <b>generate word lists</b> in seconds, focusing on specific initial or final sounds, clusters, or sound combinations. Individuals can hear and make each sound, then blend them into well-articulated words.
<b>Word Search Articulation</b>	\$4.99	Over 1,000 sound-specific <b>words hidden in puzzles</b> . Designed for SLPs to use with individuals who exhibit difficulty producing certain sounds.

## MOTOR PLANNING

<b>Singing Fingers</b>	\$0.99	Singing Fingers lets you <b>fingerpaint with sound</b> . Just touch the screen while you make a sound, and colorful paint appears. Touch the paint to play back the sound again!
<b>Turtle Talk</b>	\$6.99	Turtle Talk offers fun visual cues to help your child <b>pace their speech</b> . They can choose a conversation topic and answer questions using the Turtle Talk Paceboard.
<b>Speech Therapy for Apraxia</b>	\$4.99	Provides choices of different patterns of articulation within words and moves through a progression of levels that challenge motor planning for speech.
<b>Speech Pacesetter Pro</b>	\$7.99	Designed specifically for clients with stuttering, cluttering and dysarthria, it offers clever visual and audio cues that can effectively reduce rate of speech and <b>improve clarity</b> when reading aloud.
<b>Apraxia Picture Sound Cards</b>	\$89.99 \$179.99 for pro	This app incorporates evidence-based treatment techniques using Hand Cues which are manual gestures used to mimic articulatory movements, leading to increased procedural memory and improved <b>motor planning</b> .

<b>Apraxia Farm</b>	\$29.99	Designed by SLPs, Apraxia Farm provides <b>video modeling</b> of consonants and vowels, word targets by syllable structure, customization of targets, and progress monitoring making it perfect for use by SLPs, special educators, and parents alike.
<b>Bla Bla Bla</b>	Free	Bla Bla Bla is a <b>sound</b> reactive application for iPhone and iPad. The app includes facial features that show individuals how to make sounds with their mouths.
<b>LinguSystems Apraxia Cards</b>	\$24.99	<b>240 pictured items</b> move from basic syllable sequences to multisyllabic word productions in sentences, or you can select specific combinations within the hierarchy for assessment and customized practice.
<b>Speech Blubs: Language Therapy</b>	Free	A voice controlled speech therapy app designed to help your child <b>learn new sounds</b> and practice speaking in a stimulating, educational environment.
<b>Sensory Speak Up</b>	Free	Speak Up can be used to encourage children to <b>vocalize</b> and make sounds, either through the internal microphone or via an external microphone. Designed to assist with speech therapy, the louder the voice sound, the bigger the shape or pattern becomes.
<b>SpeechStickers</b>	\$14.99	The therapist/adult begins a session by selecting a target sound to practice. The child chooses one of the five character <b>stickers</b> , places it on the screen, and repeats the sound the character makes.
<b>Speech Sounds on Cue</b>	\$12.99	This easy to use iPad app contains over 500 videos, sound clips and color photos designed to help adults and children produce <b>consonant</b> speech sounds in isolation, in words and in sentences.
<b>Speech Therapy for Apraxia - Words</b>	\$4.99	Begins at the production of single words with easier patterns of articulation and progresses through increasingly more difficult production sequences all the way to the production of <b>sequences</b> of random words.

<b>Toca Pet Doctor</b>	\$3.99	Beautiful artwork and fun sounds designed for ages 2-6 guides kids through different activities empowering them to take care of and feel for the <b>animals</b> .
------------------------	--------	---

<b>VowelViz Pro</b>	\$49.99	An innovative speech mapping app that provides a fun and engaging foundation to practice clear and consistent <b>vowels</b> , without guessing, in order to develop and strengthen muscle memory effectively.
---------------------	---------	---

## NARRATIVE LANGUAGE

<b>Talk About it: Objects Home HD</b>	\$2.99, available in pro for \$5.99	Helps children identify which information is important about an object then provides a way to apply this knowledge in an expressive, narrative language task. Perfect for practice defining, describing, vocabulary development, explaining, and understanding what's important about an object or place.
---------------------------------------	-------------------------------------	---

<b>Story Builder</b>	\$7.99	Designed to help children accomplish the following educational goals: 1) improve paragraph information; 2) improve integration of ideas; and 3) improve higher level abstractions by inference.
----------------------	--------	---

<b>60 Story Starters</b>	\$1.99	Students just touch the screen to listen to a story starter, and then <b>say or write</b> what they think will happen next.
--------------------------	--------	---

<b>My PlayHome</b>	\$3.99	Create scenes of <b>daily living</b> , and play with a partner who also has the app.
--------------------	--------	--

<b>Rory's Story Cubes</b>	\$1.99, plus available in-app purchases	Shake to roll the cubes. <b>Create</b> a story using all 9 face-up images.
---------------------------	---	--

<b>Sago Mini Doodlecast</b>	\$3.99	A unique drawing app that records your voice as you draw. Comes with more than 30 drawing prompts - simple questions designed to inspire your child's <b>imagination</b> . Choose a prompt or start from scratch.
-----------------------------	--------	---

<b>Sequence It!</b>	Free	Intended for strengthening the understanding of processes based on a <b>sequence of events</b> . Sequence It! enables two methods of work: watching the sequence for acquisition, and arranging the steps in the correct order, with three levels of difficulty.
---------------------	------	--

<b>TeleStory</b>	Free	Write, direct, and star in your own <b>TV show</b> with TeleStory!
------------------	------	--

<b>Toca Life: School</b>	\$3.99	Create your very own school <b>adventures</b> .
--------------------------	--------	---

# Language and Language Learning

## BASIC CONCEPTS

**Adjective Remix** \$9.99

Developed and designed by an SLP, this app targets practicing vocabulary knowledge of adjectives. **Adjectives** are segmented into 8 major categories and the app can be used with one or multiple children.

**Bitsboard Pro** \$19.99, a free version is available

Ideal for learning languages, mastering vocabulary, learning to read, learning to speak, etc. Includes tens of **thousands of flashcards** and lessons covering hundreds of topics.

**PrepPositions Remix** \$14.99

A multi-purpose app designed to encourage language and formulating sentences containing **prepositions**. With 15 levels, multiple sentences for each level, and the ability to adjust levels to fit individual needs, this comprehensive app is perfect for students struggling with understanding and using prepositions.

**Tiny Tap** Free, plus available in-app purchases

A teacher-created library of **interactive** activities.

**Visual Creator** \$29.99, plus available in-app purchases

Includes over 1,100 photos with plain backgrounds specifically designed for education and special needs. Ideal for anyone who is a parent, educator, or caregiver working with individuals who are **visual learners** that can benefit from using clear visuals, photo schedules, worksheets, and visual aids.

## PHONOLOGY

**Phonological Awareness Lab** \$21.99

This fun, multi-level game includes activities such as **blending** syllables, blending sounds, rhyming identification, rhyming selection, and rhyming match.

**Endless Alphabet** \$8.99

Each word features an **interactive puzzle game** with talking letters and a short animation illustrating the definition.

<b>ABC Magic Phonics</b>	Free	This app will help your child learn the sounds of the letters of the alphabet, which are necessary for reading. A matching phonetic photo image is matched with each letter to help your child <b>learn the sound of each letter.</b>
<b>First Words Deluxe</b>	\$4.99	Includes over 150 words in 5 kid-friendly categories: animals, vehicles, colors, shapes, and words from around the house. <b>Available in English, Spanish, French, German, and Japanese.</b>
<b>i Can Spell with Phonics</b>	\$1.99	Teaches 150 sight words with regular spelling. Breaks words into <b>“phonic chunks”</b> and sounds them out. Words are taught within meaningful sentences to create context with vibrant photos. Each 10-word session is made up of 3 activities, followed by a reward game.
<b>Lively Letters</b>	\$9.99	Simultaneously trains critical skills for reading, spelling, and pronunciation of English language sounds. Uses a <b>multi-sensory</b> , structured approach that has been shown to help students of all ages and abilities.
<b>Montessori Crosswords</b>	\$2.99	Montessori Crosswords helps kids develop reading, writing, and spelling skills by <b>building words</b> from a set of 320 word-image-audio-phonics combinations using a phonics-enabled moveable alphabet.
<b>Montessorium: Intro to Letters</b>	\$3.99	Intro to <b>Letters</b> will help your child learn to trace, read, write, and record letter sounds, names, and phonograms.
<b>Phonics Genius</b>	\$0.99	This app is specifically designed to help students recognize and <b>distinguish words by sounds.</b> Over 6,000 words grouped into 225 categories by phonics.
<b>Phonics Studio</b>	\$1.99	With over 2,500 flashcards, phonic sounds are grouped by letter into 200+ <b>unique sound groups.</b>
<b>Phono Learning Center</b>	\$19.99	Designed to assist in <b>sound production</b> therapy, this multi-player app encourages active participation in four game-like activities that target specific patterns of phonemes and words.
<b>Sight Word Bingo</b>	\$0.99	Sight Word Bingo will let your kids learn their sight words with a fun <b>barnyard theme.</b> The object is to get five barnyard animals in a row by correctly identifying the word when it is spoken.
<b>Dyslexia Quest</b>	\$9.99	Assess working memory, <b>phonological awareness</b> , processing speed, visual memory, auditory memory, and sequencing skills.

**Smarty Spell** \$3.99

An educational platform for students to practice and perfect their **spelling skills**. Words can be selected by grade level or by category with a total of over 300 built in words.

**Tutit**

Free download, pay by the minute for tutoring

Allows for **immediate access to qualified reading tutors**, teachers, and professors anywhere, anytime. Enables students and tutors to participate in sessions virtually while using chat, photo/homework upload, audio, and interactive whiteboard features.

**Word Wagon** Free

Teaches letters, phonics, and spelling. Word Wagon teaches **more than 100 words**. There are 4 levels of learning where kids will learn letter names, sounds, and spelling of 4 and 6 letter words.

**Word Wizard for Kids** \$4.99

A talking moveable **alphabet** that allows kids to experiment with phonics and word building thanks to the advanced text to speech engine.

## SEMANTICS

**Categories Learning Center** \$11.99

A multi-level, multi-player app designed by SLPs to improve language **comprehension**. Use this app to help individuals sort items that belong to a certain category and increase receptive and expressive vocabulary through picture stimuli.

**iAssociate 2** Free, plus available in-app purchases

A **word association game** where players have to figure out which words or phrases are associated with each other.

**Popplet** \$4.99, also a lite version available for free

Use this app to quickly **jot down your ideas** and sort them visually. Popplet is great for school and for learning in the classroom and at home. By capturing facts, thoughts, and images, students learn to create relationships between them and generate new ideas.

**Autism Sort Therapy SLP Game** Free, plus available in-app purchases

Teach your child about **sorting** and arranging with this fun, sorting application. This app helps develop conceptualization, visual perception, and fine motor skills.

## VOCABULARY

<b>Action Verbs</b>	\$0.99	Includes over 8 unique <b>learning games</b> and activities as well as a huge library of photos. You can easily customize games, action words, and add your own photos.
<b>Action Words</b>	\$0.99	This app helps kids learn new <b>action words</b> by showing photographs where the actions are clearly acted out. Easily customizable.
<b>Adjective Remix</b>	\$9.99	Developed and designed by an SLP, this app targets practicing vocabulary knowledge of adjectives. <b>Adjectives</b> are divided into 8 major categories and the app can be used with one or multiple children.
<b>My PlayHome</b>	\$3.99	Create scenes of daily living, and <b>play with a partner</b> who also has the app.

## SYNTAX

<b>Comprehension Builder 2</b>	\$7.99	Designed to help children learn to answer <b>abstract</b> questions and create responses based on inference. Extensive use of audio clips promotes improved auditory processing for children with special needs.
<b>Syntax City</b>	\$19.99	Designed by an SLP, this app targets a variety of <b>grammatical elements</b> . Each location in the city targets a different set of goals.
<b>Fun with Verbs &amp; Sentences</b>	\$15.99	Provides a fun way to <b>visually</b> show left to right sentence building (early literacy concepts) and sequence the parts of a sentence in the right order.
<b>First Phrases</b>	\$15.99, lite version available for \$0.99	This app is perfect for a child learning how to put two or three words together or any child who is learning <b>basic English phrases</b> . It provides many opportunities to hear (receptive), see, and say/record (expressive) 72+ different verb and noun combinations.
<b>Speech with Milo: Prepositions</b>	\$2.99	Milo demonstrates 23 location words such as “inside,” “above,” and “behind.” The animated milo will win your child over so you can work on basic <b>location</b> concepts.
<b>Speech with Milo: Verbs</b>	\$2.99	Milo performs over 100 actions, such as “bounce,” “count,” and “play.” This provides an engaging way to build up an <b>action word</b> vocabulary.

# Behavior and Social Skills

## EXECUTIVE FUNCTION

**Brili** Free, plus available in-app purchases

**Set up a routine** for morning, bedtime, and any other time of the day. Brili displays kids' routines as a game in Kid Mode, showing them what's next, how much time they have left, and prompting them at the appropriate times to keep them on track.

**Choice Works** \$6.99

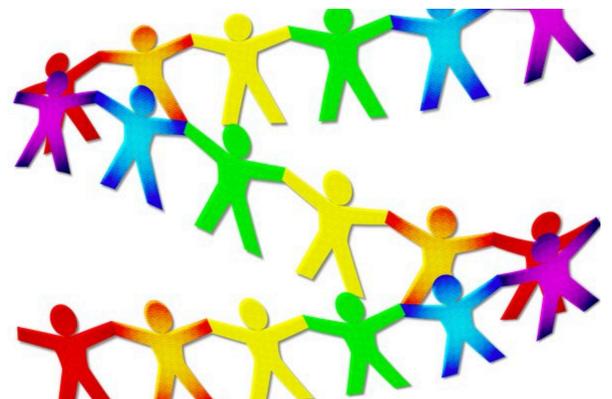

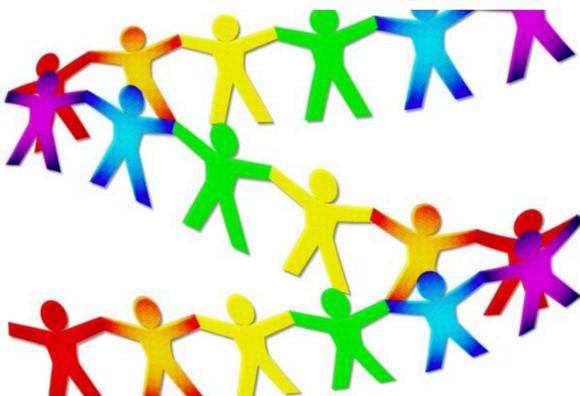

Helps children complete daily routines, understand and control feelings, and improve waiting skills. Designed to help foster a child's **independence**, positive behavior, and emotional regulation.

**Visual Schedule Planner** \$14.99

A customizable **visual schedule** app that is designed to give an individual an audio/visual representation of the "events in their day." Events that require more support can be linked to an "activity schedule" or "video clip" to help model the task even further.

**Custom Boards** \$129.99, or six-month subscription for \$49.99

Designed to serve as a board and activity creator for speech therapists, teachers, special education, and parents of children who need symbols to communicate and learn. Includes **over 15,000 built-in symbols** from the Smarty Symbols library and the ability to add your own photos.

## FOLLOWING DIRECTIONS

<p><b>Following Directions by Teach Speech Apps</b></p>	<p>\$3.99</p>	<p>Helps to <b>develop the skills</b> needed to boost memory, motor, and auditory processing skills with simple one step directions, two step complex commands, inclusion/exclusion, conditional and motor-skill based directions. Great for working on language, auditory processing, vocabulary, memory, receptive language, attention, and focus.</p>
<p><b>Following Directions Monsters</b></p>	<p>\$19.99</p>	<p>Designed by educators to help children practice and improve their <b>auditory memory</b> and following directions skills.</p>
<p><b>Fun with Directions</b></p>	<p>\$15.99, lite version available for \$0.99</p>	<p>Provides a fun and engaging way to practice <b>listening</b>, following directions, colors, comparatives (larger/smaller) spatial concepts, auditory memory and auditory processing.</p>
<p><b>More Fun with Directions</b></p>	<p>\$15.99, lite version available for \$0.99</p>	<p>Provides the same education as “Fun with Directions” with an additional focus on <b>12 tasks</b>: turn on/turn off, up/down, front/behind, on/under, put in/take out, and above/below.</p>
<p><b>Listening Power Preschool</b></p>	<p>\$19.99, lite version available for \$0.99</p>	<p>Has 5 colorful, engaging listening games with over 1200 <b>listening tasks</b> and 3 levels of play.</p>
<p><b>Picture the Sentence</b></p>	<p>\$9.99, lite version available for \$0.99</p>	<p>An app designed to practice language and auditory processing tasks at the basic <b>sentence</b> level.</p>
<p><b>Adam’s ABC Games</b></p>	<p>Free</p>	<p>Includes alphabet <b>ABC games</b>, letter matching, letters games and more.</p>

## SOCIAL SKILLS

<p><b>Model Me Going Places</b></p>	<p>Free</p>	<p>A great visual teaching tool for helping your child learn to navigate challenging locations in the community</p>
<p><b>Autism Emotion</b></p>	<p>Free</p>	<p>Uses music and photo slideshows to teach individuals about different <b>emotions</b>. Choose an emotion and swipe through photos of people expressing it.</p>
<p><b>Let’s Be Social</b></p>	<p>Free</p>	<p>Teaches <b>communication skills</b> and models personal interactions, navigating the community, appropriate school behavior, handling change, and social relationships. Lessons and images are customizable.</p>

# Occupational Therapy Supplements

## FINE MOTOR

### Dexterity

\$4.99, available in-app purchases

Improves fine motor skills and handwriting readiness in children and helps build **strength, control, and dexterity.**

### LetterReflex

\$3.99, available in-app purchases

Provides a fun way to help **remediate common letter reversals**, helping kids discriminate between “b and d” and “p and q.”

## HANDWRITING

### Ready to Print

\$9.99

Progresses through pre-writing skills in a specific order so that children can master the visual-motor, visual-perceptual, and fine motor skills necessary for correct **printing patterns.**

### LetterSchool

\$9.99

Practice and develop essential phonics and handwriting skills as you play three exciting **games per letter or number.**

## VISION

### Vision Tap

Free, available in-app purchases

Helps with **eye-hand coordination**, reaction time, as well as some reading and learning issues. Vision-related procedures assess and improve perception, saccadic eye movement, reaction time, and memory.

### Block-a-doodle-doo

\$0.99

Introduces young children to problem solving and **visualizing positions**, directions, and movements.

### Highlights Hidden Pictures Puzzle Town

Free, available in-app purchases

Learning across 5 game types including puzzles, mazes, matching games, and more to help with **early literacy**, math, and problem-solving skills.
