

Are you the parent of a child/adolescent with movement related difficulties such as Developmental Coordination Disorder (DCD) or Dyspraxia?

If so, this study wants to understand the relationship between race/ethnicity in motor milestones and later motor problems in children and adolescents with Dyspraxia/DCD.

## Criteria

PARENT OF A CHILD/ADOLESCENT AGED 5-18 YEARS WITH DIAGNOSED OR UNDIAGNOSED MOTOR DIFFICULTIES.
